Give it a go. You may want to also request we get guidance on what it means to collaborate with ARSG especially when we aren't allowed to talk with them...

I'm trying not to be irritated by this request to "write a proposal, so we'll be allowed to do our jobs".

Have you started this, or would you like for me to take the first stab at a few bullets?

Subject: Mineral Creek Sampling - Upper Animas Site

In my discussions with Johanna, she suggested that you have Bill Murray present the proposal to conduct the Mineral Creek sampling to the Gold King Leadership team. She thought that the leadership team would support the Mineral Creek Sampling. The proposal should be a less than a page and include the goals of the investigation, that the sampling effort will be coordinated with the Forest Service and ARSG, and timing of coordination and sampling events.

Please include that the sampling would support the possible proposal of the site to the NPL.
